## Change Password

Use this page to change the password you use for logging into the server via SSH, telnet or FTP, or for picking up email via POP3. Your Samba password used when accessing files on the server from a Windows system will also be changed.

<b>Changing for user</b>	aida
<b>Current password</b>	<input type="password" value="●●●●●●●●"/>
<b>New password</b>	<input type="password"/>
<b>New password again</b>	<input type="password"/>
<input type="button" value="Change Now"/>	

Selamat Mencuba!!
